

# Feedback

## Finn sales web app

### Overall feedback

- Success and error messages should be displayed above the tables not in javascript popups. Please use the success and error messages from Twitter bootstrap.
  - When you submit content, show New “type” has been added. in a success message.
  - Missing a field that is required, show “”Field” is required, please provide the information, to continue.”
- Searching inside the tables breaks the content.

### Users overview

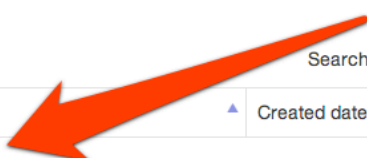

A paragraph of details about the heading and its related content so that you can have an example of how this should work.

10 records per page

Search:

Email address	Created date	Blocked
No data available in table		

Showing 0 to 0 of 0 entries

**When you search the data breaks?**

- Default sorting of tables besides the category and tags tables should be.
  - Asc on email for users.
  - Desc on date for presentations.
- My account should link to my account in the app or a form in the admin to change password.

Could we print a twitter bootstrap notification styled message on the page with "user already exists."

The page at europa.kroma.no.c.bakabo.net:2403 says:  
[{"errors":{"username":"is already in use"},"status":400}]

OK

Create presentation Cancel

Undefined?

Undefined?

These fields have no upload file?  
Each one should have a upload field and can  
only upload there specific type.

Keynote = .key  
Powerpoint = .ppt  
Pdf = .pdf

Now you can also upload non specific above file types,  
that should't be possible.

## Category and tags

- Category and tags are not orderable, through drag and drop, you should be able to change the order of these items for order in the web app.

## Settings page

- The settings input fields are empty, please provide them with the current settings so we know what they are. So when you change them you know there current settings.
